

FIRST OF ITS KIND

The PATENTED Kell Adjustable HD Roller is the first of its kind, with a load capacity of 300kg per wheel, serving as a corner connector which requires no threaded rods.

COMPATIBLE

Easily compatible with R4 and R6 Sliding Doors and Windows. The HD Roller can handle a single or double galzed panel weight of 600kg

TOP QUALITY

Aluminium, Stainless Steel, Sealed Bearing and Nylon Dust Cover are used to manufacture the HD Roller. This ensures quality and longevity and makes it ideal for coastal conditions

ADJUSTABLE

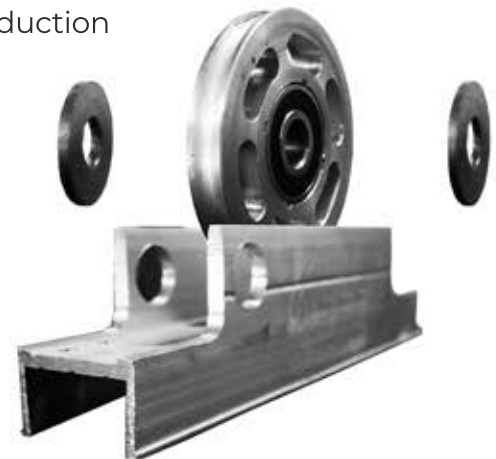

Consisting of a 50mm aluminium roller and press fitted with a stainless steel sealed bearing, the bearing is covered by a Nylon Spacer that also serves as a dust cover, this ensures no lateral play on the wheel. The bearing is connected to the aluminium casing with a 12mm aluminium shaft pressed in allowing wheel adjustability to 6mm in total.

**ADVANTAGES**

- Sealed Bearing
- Corner Connector (no More Threaded Rods)
- No Rattling of threaded rods
- Height Adjustable
- Manufactured of material that is ideal for coastal conditions
- Aluminium Wheel reacts to Aluminium Track
- Cost effective
- Faster production

SINGLE PERSON ASSEMBLY

Combine The Kell Adjustable HD Roller Corner Connector with our Kell corner Connector and no threaded rods is needed on any Sliding or Hinged Door with only 1 person needed to assemble.

**NO THREADED RODS**

The 8mm Stainless Steel Bolt serves as the threaded rod and the corner connector for the door.
